

AUTOMATED COGNITIVE TEST BATTERY

MODEL ACDT-RE-07

*Rapid, sensitive, & fully computerized Tests for research and industrial applications
by SpecialtyAutomated™*

Features

- Very fast
- Objective
- Self-service
- Instant scores & feedback
- Immediate, detailed reports
- Graphical & statistical review
- Scientifically proven
- Completely computerized
- Multimedia & interactive
- User friendly
- English & foreign languages
- Featured in the News
- Published in journals
- Easily exports data
- Standardized & paperless
- Touch screen Sytotechnology™
- Useful for all ages & cultures
- Engages physically challenged people who cannot draw or use an instrument to write

Automated Operation

SpecialtyAutomated™ introduces the first and only fully computerized suite of cognitive screening tests designed to optimize time and management of data collection, processing, and review. This battery includes a fully standardized Clock Drawing Test, one of the most widely used cognitive assessment tests in the world. The ACDT-RE-07 is a high-tech and low-cost tool that rapidly screens and monitors clients. Instant scores, reports, statistics, and feedback are provided through this unique online and web-based application. All tests are accessible through networked laptops, portable kiosks, or PCs.

Automatic Clock Drawing Tests™ offer the option for simple and self-service administration to measure cognition in small and very large populations. The battery of tests allows researchers to monitor short-term and long-term changes in subjects anywhere through our unique Internet database and systems.

Start research and development studies now with the fully automated ACDT-RE-07.

Screens for:

- Executive Function
- Visual Attention
- Memory & Comprehension
- Reaction Time
- Non-reaction Time
- Choice Reaction Time
